At the meeting, you may want to listen for any "asks" about the State Board's workshops on revising the Delta outflow standards. Those workshops (three, I think) start in September, and lead up to staff proposals (and hopefully Board action) on new water quality standards. We are being very supportive of the Board's action at this time, given that they haven't revised them in 17 years (since Bob was doing Delta things).

any idea when it may be released? Really, I am not trying to pour salt in a wound, just wanted to give Bob a heads up if asked by the group.

What should he know other than Dol and CA released something last week?
